

FEATHER RIVER AIR QUALITY MANAGEMENT DISTRICT  
MEMORANDUM  
06/03/2019

TO: FRAQMD BOARD OF DIRECTORS

FROM: Christopher D. Brown, AICP, APCO

SUBJECT: Approve Resolution #2019-06 to accept funding for the ARB/CAPCOA Prescribed Fire Grant Program and authorize the Chairman and APCO to execute related documents.

---

**RECOMMENDATION:**

Approve Resolution #2019-06 to accept funding from the State of California and/or the California Air Pollution Control Officers Association (CAPCOA) and authorize the Chairman and APCO to execute related documents.

**ALTERNATIVES:**

Not Approve Resolution #2019-06 and not participate in the program.

**BACKGROUND:**

Everyone in California is aware of the increasing danger of wildfires in the state as well as the health and safety impacts of fires such as the Camp Fire on California residents. The legislature responded to this fire danger by passing several bills in 2018, among them SB1260 and SB901, which were intended to remove barriers to prescribed burning and forest management and provide funding for a significant increase in these activities over the coming years. The California Air Pollution Control Officers Association (CAPCOA) and district legislative staffs worked to ensure part of this funding would go to air districts, since an increase in prescribed burning will logically require more burn permits, smoke management plans and coordination at the district level with federal, state and local teams that will manage these burns. There is \$2 million in the 2018/19 Air Resources Board (ARB) budget targeted to air districts.

After extensive discussion ARB has agreed to provide funding to air districts supporting the need for increased monitoring and public outreach, half of the funding is to go to the 32 districts that ARB can directly fund to support staffing for the increases in burn permits and

smoke management plans. A portion of the remaining funds will be held at the state level and go toward reimbursable training costs for districts and reimbursable funding for district staffing costs of monitoring prescribed burns. ARB will retain some funds for storing and maintaining monitoring equipment across the state in selected districts.

**DISCUSSION:**

The resolution will authorize participation in the Prescribed Fire Grant Program and authorize the District to accept funding of \$20,000.

The grant monies would support district staff in tracking, reviewing, allocating, recording, logging, and reporting prescribed burning in the current Open Burning Program. In general, the air district is currently conducting most activities proposed and would be adding the following tasks, though the final agreement and task details has not been issued yet.

1. Keep track of prescribed fires in the district and report this data quarterly. Use the ARB online tool called Prescribed Fire Information Reporting system (PFIRS) for recording data on burns where feasible.
2. Work with ARB to place air monitors at 60+ prescribed burns across the state over the next year.
3. Work with state agencies on messaging to the public about why more prescribed burning is needed, informing the public where burns are occurring, and providing increased access to air quality information.
4. Access training funding where needed to train district staff.
5. Access funding to support prescribed fire air monitoring.

**FISCAL IMPACT:**

The Prescribed Fire Grant Program would add reporting and coordination efforts to district staff and provide \$20,000 in FY 19/20 to pay for these services.

**ATTACHMENTS:**

A – Resolution #2019-06

Attachment A – Resolution #2019-06

**RESOLUTION #2019-06 OF THE BOARD OF DIRECTORS AUTHORIZING PARTICIPATION IN THE PRESCRIBED FIRE GRANT PROGRAM**

**WHEREAS**, the State of California adopted Senate Bill (SB) 1260 (Jackson, 2018) and SB 901 (Dodd, 2018); and

**WHEREAS**, the SB 1260 directed the Air Resources Board, in coordination with the air quality management districts, to develop a program to enhance air quality and smoke monitoring, and to provide a public awareness campaign regarding prescribed burns; and

**WHEREAS**, the SB 910 allocated funding that will be made available to air districts to develop and implement such a program; and

**WHEREAS**, the Feather River Air Quality Management District issues prescribed burning permits for the disposal of vegetative waste from forest clearing operations, as well as provides public outreach and information on prescribed burns.

**NOW, THEREFORE, BE IT RESOLVED** that the Feather River Air Quality Management District affirms its interest in participating in the Prescribed Fire Grant Program; and

**BE IT FURTHER RESOLVED**, that the Air Pollution Control Officer is hereby authorized and empowered to accept funding up to \$20,000 and execute on behalf of the District a grant agreement with the ARB and/or CAPCOA, and all other necessary documents to implement and carry out the purposes of this resolution.

PASSED AND ADOPTED by the Board of Directors of the Feather River Air Quality Management District at a regular meeting on June 6, 2019 by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

ATTEST:  
CLERK OF THE DISTRICT BOARD
